

Volume 8, No. 1, Fall, 1995  
**CLIME Connections**  
*Council for Logo & Technology  
in Mathematics Education*

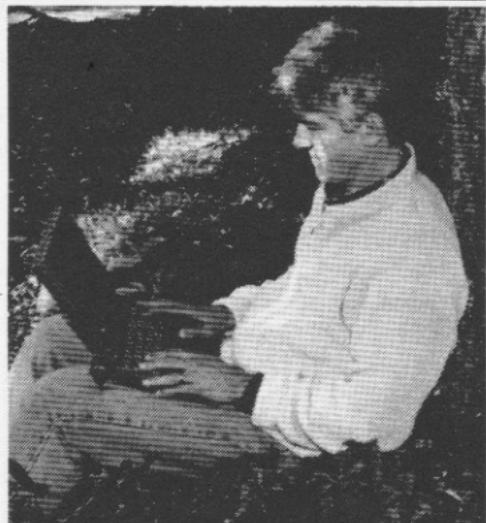

## Clime Bytes

• *CLIME Connections goes electronic!* This is our last newsletter in the old format. Starting in 1996 we will begin "publishing" an electronic

version via e-mail and the World Wide Web. The focal point will be a WORLD WIDE WEB HOME PAGE which will contain useful information about our efforts (as an NCTM affiliate) to keep our members informed on issues related to teaching and learning mathematics with technology. We will be affiliated with the new Math Forum (formerly the Geometry Forum) and included will be information about effective software for mathematics teaching. (See our TOP TEN software list below.) We will unveil our home page at a very special event in April, 1996.

## WHO IS CLIME?

The Council for Logo & Technology in Mathematics Education (better known as CLIME) is an affiliate member of NCTM and committed to supporting effective technology-based practices in the classroom.

COMING SOON TO A COMPUTER NEAR YOU!

• **THE ANNUAL CLIME MEETING WILL BE A 10TH ANNIVERSARY GALA EVENT** (to be held during the annual NCTM meeting) IN SAN DIEGO. If you are going to the NCTM meeting in San Diego, there will be a "special edition" CLIME meeting on April 25th, 1996 at 5:00pm. We will be taking a trip down memory lane reliving important milestones in the evolution of technology applications. Our presenters will have had at least a 10 year perspective on technology and software applications. This year one of the more exciting new tools will be the TI-92 which I'm sure we'll talk about. Another presentation will be looking at using measurement tools to analyze real world phenomenon brought to the computer screen via video (Measurement in Motion). Also, a creative teacher will share how she makes math come alive with graphing calculators.

PLEASE LET ME KNOW IF YOU ARE PLANNING TO ATTEND THE SAN DIEGO MEETING! For those unable to attend, we will post a summary of the session on our home page.
